

PROJECT-2 REPORT

Exploratory Data Analysis (EDA) on E-Commerce Dataset

1.OBJECTIVE

The objective of this project is to perform Exploratory Data Analysis (EDA) on an e-commerce dataset to identify useful patterns and summarize important business insights.

2.TOOLS USED

- Google Sheets
- Microsoft Excel
- Basic Statistical Functions

3.ANALYSIS PERFORMED

The following analyses were performed:

- Total Orders
- Average Quantity
- Median Quantity
- Average Unit Price
- Median Unit Price
- Average Total Price
- Median Total Price
- Most Sold Product
- Most Used Payment Method
- Most Used Coupon Code
- Most Common Order Status

4.RESULTS

Total Orders: 1200

Average Quantity: 2.945833333

Median Quantity: 3

Average Unit Price: 356.41275

Median Unit Price: 364.21

Average Total Price: 1053.9683

Median Total Price: 823.615

Most Sold Product: Printer

Most Used Payment Method: Online

Most Used Coupon Code: FREESHIP

Most Common Order Status: Cancelled

5.CONCLUSION:

This project successfully analyzed the dataset using Exploratory Data Analysis techniques. The analysis provided valuable insights into customer purchases, payment preferences, coupon usage, and order status trends. The cleaned and analyzed dataset can be used for further business and sales analysis.
